WORK EXPERIENCE

3 Months Internship Spark Foundation (Data Science)

08/2021 - 11/2021

Achievements/Tasks

- Using ML Algorithm to predict the given output.
- Able to understand the Data Science and Business Analytics.
- We have to create the video of our work and post in linkedin.

Contact : From Linkedin - LinkedIn Only

Work Experience Beta Analytics(Intern in software engineering)

08/2021 - 02/2022

Tasks

- Completion of maximum 3 projects.
- Working with python(quart framework). Similar to flask.
- Working with team.

Contact : From Friends

SKILLS

Communication Skills

Web Scraping (BeautifulSoup , Requests)

Back-End Development(Django)

Research

Big Data Analysis

Databases

Data Science

Front-End Skills

NO-SQL (Mongo DB)

Artificial Intelligence and Machine Learning

PERSONAL PROJECTS

Customer Churn Prediction Using ANN (05/2021)

- It will predicted whether the customer buy churn or not

Diabetes Prediction Using Machine Learning Model (08/2021)

- We train the model using Logistic Regression Machine Learning Model on diabetes dataset. Logistic Regression classifier into two classes either 0 or 1. If the person have diabetes it returns 1 otherwise it will returns 0. It is deployed in Django Framework

Flight Project (02/2022)

- User will able to register and login in order to book the flight for their destination.
- It is made in Python with (Django Framework) with CRUD Functionality.

Book Project (02/2022)

- It has the functionality of upload, delete and search. It is function-based views.
- It is made in python with (Django Framework).

E-Library (02/2022)

- In this project there is two user Author, Reader. Author will able to add book, delete book where Reader can only view the book and download. It has CRUD with Search Functionality.
- It is made in python with (Django Framework)

CRM(Customer Relationship Management) (02/2022)

- In this project admin and customer are two group. where admin can views the home page and customer can able to see the order they have done. Customer cannot not allowed to use homepage but admin does. Admin cannot allowed to use customer page. It has CRUD Functionality.
- It is made in python with (Django Framework)
